

MAKE A TREFOIL

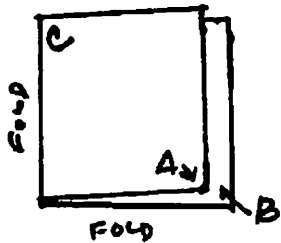

1. Fold a square piece of paper in half so that the open edges are at the top. Label folded edge corners A at the left and B at the right.
 2. Fold in half again bringing corner A toward you placing corner A on corner B (Short edges against short edge. All the open corners are at the top right and the two folded edges are at the bottom. Mark upper left corner C.
 3. Fold the lower right hand corner A (fold at bottom, open edges at right side) up to the upper left corner C. It will fold diagonally from lower left to upper right.
 4. Pick a point D along the diagonal fold (approximately in the middle). Mark it D. Connect a dotted line from point D to point B. Also make a dotted half circle from point D to point C.
 5. Holding the figure with the left hand, cut along the dotted line letting the right hand pieces fall.
 6. Open up the piece held by the left hand . **TREFOIL !!!!**
